

# Pramod Adhikari

Postdoctoral Researcher

Department of Atmospheric Science, University of Wyoming

✉ [Pramod.Adhikari@uwyo.edu](mailto:Pramod.Adhikari@uwyo.edu)

---

## EDUCATION

**Ph.D. (Atmospheric Science)** University of Nevada, Reno, USA 2018-2022

- Dissertation: “*Aerosol-cloud-precipitation interaction based on remote sensing and cloud-resolving modeling over the Central Himalayas*”
- Advisor: Dr. John F. Mejia, Associate Research Professor

**MS (Atmospheric Science)** University of Nevada, Reno, USA 2015-2017

- MS Thesis: “*Assessment of wind regime and sediment transport activity at Oceano Dunes, California*”

**MSc. (Physics)** Central Department of Physics, Tribhuvan University, Nepal 2011-2015

- MSc. Thesis: “*Numerical reconstruction of early monsoon weather situation over Arun valley of eastern Nepal Himalaya*”

**BSc. (Physics)** St. Xavier’s College, Tribhuvan University, Nepal 2007-2010

## KEY SKILLS

1. Modifying and running Regional numerical modeling (WRF and WRF-Chem) at high resolution (temporal and spatial scale)
2. Regional and global climate data analysis
3. Large spatial and temporal gridded data analysis and visualization (observational, reanalysis, and model output)
4. Working on high-performance computing (e.g., Cheyenne and Derecho by NCAR-CISL)
5. Everyday usage of Jupyter notebook and Python
6. Scientific programming (Python, R, and FORTRAN)
7. Working within Linux environments

## PUBLICATIONS

3. **Adhikari, P.,** Geerts, B., Rahimi-Esfarjani, S., Shuman, B. N., Albeke S., (2025) Changes in precipitation extremes over the Western United States under global warming levels of 2°C and 3°C (in preparation)
4. Smith K., Geerts, B., **Adhikari, P.,** Day K., Rahimi S., Shuman B., and Schneider T. (2025) Evaluation of CONUS404 cold-season precipitation and snowpack over the mountainous western United States (in preparation)

### **PROFESSIONAL EXPERIENCE**

1. **Postdoctoral Researcher,** University of Wyoming *January 2023- present*
  - Project: Wyoming Anticipating Climate Transitions (WyACT)
  - Dynamically downscale using regional climate model to improve the predictive understanding of the coupled human-environment impacts of climate change on water availability.
  - Analyze the global climate models
  - Evaluated the retrospective climate simulations and conducted high-resolution simulation for future climate projections for the Interior Western US
  - Collaborated with the scientists at NCAR for simulation execution and data processing.
  - Contributed and collaborated with visualization and dissemination team for the development of a public-facing web portal for communicating region-specific climate change information to community partners, addressing challenges like precipitation shifts, water availability, and extreme events across the western US, using dynamically downscaled CMIP6 GCM outputs.
  - Mentored undergraduate and graduate students
2. **Postdoctoral Researcher,** New Mexico State University *August 2022 -December 2022*

- NASA's Planetary Data System: The Planetary Atmospheres Node at the Department of Astronomy
  - Work as part of a team of scientists developing a planetary data system-equivalent archive of atmospheric modeling output through a new Atmospheric Modeling Annex.
3. **Graduate Research Assistant (PhD)**, Desert Research Institute, Reno  
2018- 2022
- Handle and analyze long-term and large gridded datasets from satellite and reanalysis product
  - Lead the project and apply for the funding and computational resources
  - Design model experiments and run cloud-resolving WRF-Chem simulations in a high-performance computing environment
  - Prepared various anthropogenic, biogenic, fire emission, and initial/boundary condition datasets to be used for WRF-Chem
  - Analyze data from the simulation, compile results and prepare a manuscript for publications
4. **Graduate Teaching Assistant**, University of Nevada, Reno 2018-2022
- Teach physics laboratory and recitations for undergraduate students majoring in physical sciences, engineers, and non-physical sciences
  - Design syllabus, deliver lectures, conduct a discussion on physics problems, and run lab assignments
  - Ensure a positive learning environment as reflected in course evaluation
5. **Graduate Research Assistant (M.S.)**, Desert Research Institute, Reno  
2015-2017
- Compiled, validated, and analyzed multi-year datasets to identify the sand transport events over the Oceano Dunes, California
  - Analyzed long-term wind speed data to infer the sand transport potential

### CONFERENCE PROCEEDINGS

1. **Adhikari, P.**, et al., (2025) Predicting weather extremes and water resources in the climate transition: a focus on the Western United States American Meteorological Society Annual Meeting, 2025.
2. **Adhikari, P.**, et al., (2024) Changes in wet and dry extremes in a dynamically downscaled datasets, American Geophysical Union Fall Meeting, 2024.
3. **Adhikari, P.**, et al., (2023) Elevation-dependence evaluation of historical bias-corrected dynamically downscaled GCMs across the western U.S., American Geophysical Union Fall Meeting, 2023.
4. **Adhikari, P.**, Mejia, J. F. (2022). Impact of dust aerosols on the convective system using cloud-resolving WRF-Chem simulation over the Nepal Himalayas, American Meteorological Society Annual Meeting, 2022.

5. **Adhikari, P.**, Mejia, J. F. (2020). Impact of transported dust aerosols on precipitation over the central Himalayas using convection permitting WRF-Chem Simulation, American Geophysical Union Fall Meeting.
6. **Adhikari, P.**, Mejia, J. F. (2019). Influence of aerosols on precipitation and vertical temperature distribution over the foothills of Himalayas during the Indian summer monsoon, AGU Fall Meeting: San Francisco, CA, December 9-13, 2019.

## **MEDIA COVERAGE**

1. The Kathmandu Post, **Kathmandu, Nepal**, May 10<sup>th</sup>, 2021: Air pollution not only impacts health, but can also trigger floods and landslides, study finds ( <https://kathmandupost.com/climate-environment/2021/05/09/air-pollution-not-only-impacts-health-but-can-also-trigger-floods-and-landslides-study-finds> )
2. Air Quality News, **United Kingdom**, May 10<sup>th</sup>, 2021: Air pollution could trigger flooding, study suggests ( <https://airqualitynews.com/2021/05/10/air-pollution-could-trigger-flooding-study-suggests/> )

## **HONORS AND AWARDS**

1. *Graduate Student Association travel award*, University of Nevada, Reno 2022
2. *Colin Warden Memorial Endowment, Outstanding graduate student researcher*, Desert Research Institute, Reno, Nevada 2021
3. *Graduate Student Association travel award*, University of Nevada, Reno 2019
4. *Graduate Student Association travel award*, University of Nevada, Reno 2018
5. *Charles Francis Cutts scholarship award*, University of Nevada, Reno 2017-2018
6. *International graduate student scholarship award*, University of Nevada, Reno 2016-2017
7. *M.Sc. Fellowship*, Central Department of Physics, Tribhuvan University, Nepal 2011-2013

## **JOURNAL REVIEWER**

- Urban Science- MDPI, Atmospheric Research – Science Direct (Elsevier)

## **FUNDING**

- NCAR's Computational & Information Systems Laboratory (CISL-Cheyenne) supported by National Science Foundation
- Institute Project Assignment fund by Desert Research Institute

## **TRAINING AND WORKSHOPS**

- Introduction to the Community WRF-Hydro Modeling System: Interactive Hands-on Tutorial (February 2022)
- Teaching with Technology Course (January-May 2019)

- NCAR Command Language (NCL) and Visualization and Analysis Platform (VAPOR) workshop, (July 2018)
- NASA ARSET applied remote sensing webinar training on “Overview of the Global Disaster Alert and Coordination System” (February 2017)

### **Field Measurement**

- Measurement of threshold shear stress and transport conditions at White Sand Dunes, New Mexico (March 6-11, 2017)
- Wind energy assessment around Kathmandu Valley, Nepal, using SODAR (April to June 2014)

### **PROFESSIONAL ASSOCIATIONS**

- Member, American Geophysical Union
- Member, American Meteorological Society
